

RC&E offers Four-Day PSM/RMP Class *exclusively* to Kelvin Customers

Let us help you better understand your Process Safety Management / Risk Management Programs!

What will the class offer?	<p>The Four-Day class will cover all aspects of OSHA's PSM and the EPA's RMP program requirements that you've been tasked with implementing. We'll show you the WHY and the HOW of PSM/RMP compliance!</p> <p>Attendees will receive:</p> <ul style="list-style-type: none">• An overview of the PSM/RMP program followed by a point-by-point explanation of the unique requirements of the PSM/RMP laws; and• Real-world worked examples of <i>practical</i> compliance, not just theory;• Examples from actual OSHA & EPA citations, fines and inspections;• Q/ A sessions throughout the class to explore specific facility issues;• Daily lunches are provided as part of the class to network with implementers from other companies and facilities;• Helpful templates and forms to assist you in documenting compliance;• A certificate documenting Professional Development Hours to help maintain RETA CARO/CIRO certifications;
Who should attend?	<p>Anyone who is tasked with (or can benefit from a better understanding of) PSM/RMP compliance at your facility: Operators, PSM Coordinators, Safety Managers, Maintenance Managers, etc.</p> <p>This class is designed in such a way that the true beginner and the seasoned safety / refrigeration veteran can get what they need out of it.</p>
Who is teaching it?	<p>Brian Chapin, RCE's Compliance Services Manager and Scott Hudson, RCE's PSM Engineer will be the instructors.</p> <p>Our instructors have been in the PSM/RMP field as implementers and consultants for over 20yrs and have taught hundreds of people the basics of practical PSM/RMP compliance. They have conducted audits for dozens of companies and even conducted abatement audits at the request of OSHA and the EPA.</p>
Where and When is it?	<p>The class is scheduled for July 8th-11th, 2025 and will be held in the Fort Worth (Burleson), Texas area.</p> <p>The class is limited to 20 enrollees and availability is first-come, first serve. Future classes will be held based on demand.</p>
What is the cost?	<p>The cost of the class including all materials and provided lunches is \$1,595 per enrollee.</p>

<p>How do I enroll?</p> <p>I still have questions!</p>	<p>Contact Brian Chapin with the names of attendees and your contact information.</p> <p>Email: bchapin@rce-nh3.com Phone: 570-437-0660</p>
<p>What have prior students had to say about the class?</p>	<p>"With quite a lot of pre-existing PSM knowledge, I still came away with lessons learned."</p> <p>"...this class did a great job in explaining how the PSM system works."</p> <p>"Very thorough... I won't feel like I am fumbling in the dark anymore."</p> <p>"Engaging presentation of complex material. A valuable class"</p> <p>"I enjoyed the interactivity. A great deal of information but it didn't feel overwhelming due to the pictures, videos, and stories which provided a deeper understanding than just lectures."</p> <p>"This class was crucial to our team's success. We've trained over 150 of our employees through this class and it has helped us establish a common understanding of why we have PSM, what our PSM should look like, and how we need to implement PSM to get the maximum value out of the program."</p> <p>"...extremely helpful in explaining the elements and their interplay, responsibility and function. Invaluable resource."</p> <p>"I had a fairly good understanding of PSM before (the class). This class deepened my understanding to the next level."</p> <p>"This class combines law with real-world examples of how a practitioner can best implement a PSM program"</p> <p>"Great mix of the regulatory requirements, real-life examples, and humor."</p> <p>"Loved (the) stories of experiences. Some are quite comical but with much-needed information. Kept me on the edge of my seat"</p> <p>"I liked the real-world examples and stories - it helped me think about the situation (as) if I were in them."</p> <p>"Instructors are knowledgeable in their craft. You will not leave the class a master in PSM, but you will have the tools to become one."</p> <p>"...in-depth breakdown of each element allowing students to get a good grasp (and idea) of industry standards"</p> <p>"This class covered items that affect multiple job types - as someone that has had multiple positions, this was helpful"</p> <p>"The deep dives into each element gave a great top-down view...Personal life experiences were a way to break from the walls of text while remaining on topic."</p> <p>"I would recommend this class to others starting their PSM journey because PSM is intimidating and overwhelming. Brian and Scott don't make you feel like an idiot for being new to the subject. They have knowledge of ammonia refrigeration from an operator's perspective which is very relatable."</p>
